

DTV2WiFi Portable

PRODUCT SPECIFICATIONS

DTV2WiFi Portable

Portable Version

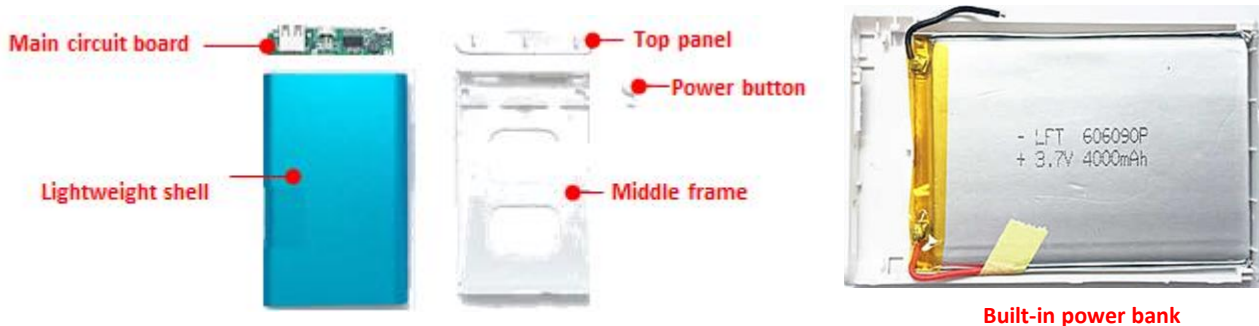

Introduction

The Anywave DTV2WiFi Portable receives off-air digital TV signals, then demodulates and transcodes into TS streams. The module then up-converts the received signal to Wi-Fi bands and operates as a hot-spot, so that you can watch live TV with your smartphone. This portable version of the DTV2WiFi module is also a compact portable charger which can provide high speed charging to your smartphone or other personal device even when the DTV2WiFi function is ON. That's longer time to enjoy your favorite TV shows!

Key Features

- ✓ Support multi-standard RF signal: DVB-T/H, DVB-T, DVB-T2, ATSC, ATSC3.0, ISDB-T & DTMB
- ✓ Transcodes TS streams to different standards including MPEG2 and H.264
- ✓ Offers various video resolutions for multiple applications: D1/720P/1080i/1080P
- ✓ Powerful error correction algorithm guarantees quality of service: better coverage, excellent Wi-Fi connection even on the move and without picture break-up
- ✓ User-friendly APP available on IOS and Android for easy access to live TV programs
- ✓ Built-in portable power bank for longer enjoyment
- ✓ Integrate LTE/4G module (option)
